

NEEDS AND WANTS: THE SUPERMARKET SHOP

This activity is designed for students in groups of four.

You are flatting with three friends. You have \$180.00 to spend on the groceries for the four of you for the week. These are the items on your grocery list. The flat has run out of all these items.

You must make decisions about what products to buy.

- Identify each product as a “need” or a “want”.
- Explain why you think a product is a need or a want.
- Justify your decision to buy or not buy each product.

Check the prices for these items on an online site. As a group decide whether you will purchase each product. Decide if you will do the shopping yourselves or have it delivered. The delivery charge must be included in your \$180 budget.

1 190g tube of toothpaste	6 750g loaves of bread	1 large cabbage	1kg kūmara
2 dozen eggs	500ml dishwashing liquid	750g box of weetbix	1kg carrots
